1 verb and verbatim

This file should not contain (and produce) any lilypond images!

Snippets inside a verbatim environment or a comment are not run through lilypond, but left as is.

You should see the begin/end lilypond commands in all three of the below tests.

The verbatim environment does not confuse lilypond-book:

```
\begin{lilypond}
c d e
\end{lilypond}
```

Neither does a verbatim inside verb:
`\begin{verbatim}\begin{lilypond}[fragment]c d e\end{lilypond}\end{verbatim}`
or verb inside verbatim:

```
\verb|\begin{lilypond}[fragment]c d e\end{lilypond}|
```

But these are just to stress `lilypond-book`.
